### *Companies Connecting Communities Mission Statement*

*It is the goal of any network to help its individual members achieve growth, experience an increase in sales, and improve name recognition. This is accomplished first and foremost by the membership making a concerted effort to do business within the network. Companies Connecting Communities will move forward and prosper through strong loyalty to the other members' products and services. Not only will we grow from within, but we'll help the other members grow their businesses through word of mouth. A referral-tracking system will be implemented to highlight and reward those members who make contributions to the common goal of our network. Companies Connecting Communities will also make charitable efforts through local organizations a priority. Our membership will have a civic-minded focus with intent to not only help those less fortunate in our communities but also those who have been stricken with life-altering diseases. Joining together in a unified effort, Companies Connecting Communities will achieve great success for its membership both personally and professionally.*
